

REVERSE-SEARED FILLET WITH HIBACHI CABBAGE, STEAKHOUSE FRIES & GOCHUJANG SAUCE

YIELD: 2 portions

March 8, 2026 · Version 1 · Main Course

Service-timed steakhouse plate built around low-temperature reverse sear, charcoal crust, and staggered finishing. Aim to serve at 18:30 with a final steak temperature of 52–54 C. The run-sheet is illustrative; temperatures and tenderness govern completion. If the fillet is unusually thick, start PHASE B 5–10 min earlier.

PREPARATION

Scaling basis: Beef Fillet · 650 g

INGREDIENT	QUANTITY	SCALING	PROCEDURE
PHASE A — GOCHUJANG SAUCE BASE (ADVANCE PREP)			
Illustrative service timing:			
17:15–17:20 or earlier. - Active time: about 5 min. - Cool and hold until Phase F.			
<u>Neutral oil</u> Neutral oil.	15 g	2.31%	1. Heat neutral oil in a small pan over medium heat.
<u>Garlic, grated</u> Garlic, grated.	5 g	0.77%	2. Add garlic and ginger; cook 30 s until fragrant.
<u>Ginger, grated</u> Ginger, grated.	5 g	0.77%	3. Add gochujang and fry 20–30 s to bloom the paste.
<u>Gochujang</u> Gochujang.	40 g	6.15%	4. Stir in soy sauce, rice vinegar, honey, and Worcestershire if using.
<u>Soy sauce</u> Soy sauce.	15 g	2.31%	5. Simmer 1–2 min until smooth and lightly thickened.
<u>Rice vinegar</u> Rice vinegar.	20 g	3.08%	6. Cool and reserve for final service.
<u>Honey</u> Honey.	10 g	1.54%	

<u>Worcestershire sauce</u> (optional)	3 g	0.46%
Worcestershire sauce (optional).		

TECHNIQUE APPLICATIONS

Technique	Controls	Purpose
<u>Paste frying</u>	Gochujang for 20–30 s after aromatics	Bloom the paste for a smooth sauce base.

PHASE OUTPUTS

Key	Phase Output	Description
sauce-base	Reserved gochujang sauce base	Cooled sauce base for final warming and finishing.

PHASE B — STEAK SEASONING AND REVERSE SEAR

Illustrative service timing:

- 17:30 Salt steak.
- 17:45 Steak into 110 C oven.
- 18:05–18:10 Pull at 46–48 C.

<u>Beef fillet</u> Beef fillet.	650 g	100.00%	7. Remove steak from refrigeration 60 min before service (17:30 for the illustrative 18:30 service).
<u>Kosher salt</u> Kosher salt.	6 g	0.92%	8. Season evenly with kosher salt on all sides.
			9. Preheat oven to 110 C.
			10. Place steak on a rack set over a tray.
			11. Roast until internal temperature reaches 46–48 C.
			12. Remove and hold at room temperature while the hibachi is prepared.

PRINCIPLES

- Protein denaturation — Bring the centre toward the authored final target before the brief crusting step.

PHASE OUTPUTS

Key	Phase Output	Description
warmed-fillet	Oven-warmed fillet	Fillet at 46–48 C internally, held for the hibachi finish.

The low oven step brings the fillet close to its final target before the crusting finish, reducing the source concern about grey banding.

PHASE C — STEAKHOUSE FRIES (SOAK + FIRST FRY)

May overlap: PHASE B — STEAK SEASONING AND REVERSE SEAR while the fillet warms.

Illustrative service timing:

- 17:40 Cut and start soaking.
- 18:00–18:06 First fry.
- Hold on rack until Phase F.

<u>Potatoes</u>	500 g	76.92%	13. Cut potatoes into thick steakhouse fries.
Potatoes.			14. Soak 20 min in cold water, then drain and dry thoroughly.
<u>Neutral frying oil</u>	As needed	—	15. Fry at 160 C for 5–6 min until cooked through but still pale.
Neutral frying oil. Source amount: as needed.			16. Drain and rest on a rack until final frying.

TECHNIQUE APPLICATIONS

Technique	Controls	Purpose
<u>Double frying</u>	First fry 160 C for 5–6 min; rest on rack	Cook potato interiors before crisping.

PHASE OUTPUTS

Key	Phase Output	Description
par-cooked-fries	Par-cooked fries	Pale first-fried potatoes resting on a rack.

PHASE D — HIBACHI CABBAGE

May overlap: PHASE B — STEAK SEASONING AND REVERSE SEAR while coals establish.

Illustrative service timing:

- 17:50 Light hibachi; let coals establish.
- 18:08 Cabbage onto hibachi.
- 18:12 Flip.
- 18:16 Off the fire; dress immediately.

<u>Baby red cabbages</u> Use exactly 2 baby red cabbage heads, halved through the core; preserve this non-mass count.	As needed	—	17. Cut cabbages in half through the core.
<u>Neutral oil</u> Neutral oil.	10 g	1.54%	18. Lightly oil and salt the cut faces.
<u>Salt</u> Salt.	3 g	0.46%	19. Place cut-side down over very hot coals and char 3–4 min without moving.
<u>Rice vinegar</u> Rice vinegar.	15 g	2.31%	20. Flip and move to slightly cooler heat.
<u>Sesame oil</u> Sesame oil.	5 g	0.77%	21. Cook 3–4 min more until tender through the core.
<u>Honey</u> Honey.	5 g	0.77%	22. Remove and dress with rice vinegar, sesame oil, honey, and sesame seeds if using.
<u>Sesame seeds (optional)</u> Sesame seeds (optional). Source amount: to finish.	As needed	—	

TECHNIQUE APPLICATIONS

Technique	Controls	Purpose
<u>Charring</u>	Very hot coals for 3–4 min, then cooler heat for 3–4 min	Char cut faces and finish the cabbage core.

PRINCIPLES

- Acid balance — Dress the cabbage with vinegar, oils, and honey.

PHASE OUTPUTS

Key	Phase Output	Description
charred-cabbage	Charred cabbage	Four dressed cabbage halves for plating.

The source allows cabbage a short hold before plating so it can leave the fire before the steak sear.

PHASE E — HIBACHI SEAR AND REST

Illustrative service timing:

- 18:16–18:18 Hibachi sear.
- 18:18–18:28 Rest.
- Keep slicing board and knife ready during the rest.

<u>Neutral oil</u> Neutral oil.	10 g	1.54%	23. Pat steak dry and rub lightly with neutral oil.
<u>Butter</u> Butter.	20 g	3.08%	24. Sear over the hibachi 45–60 s per side. 25. Rotate once per side if needed for even crust. 26. Briefly sear the edges. 27. Remove from the heat and add butter to coat. 28. Rest 10 min before slicing.

TECHNIQUE APPLICATIONS

Technique	Controls	Purpose
<u>Searing</u>	45–60 s per side; briefly sear edges; 10 min rest	Build a charcoal crust quickly.

PRINCIPLES

- Maillard reaction — Dry the fillet before the hot charcoal finish.
- Carryover cooking — Retain the 10 min rest and 52–54 C final target.

PHASE OUTPUTS USED

Phase Output	Use
Oven-warmed fillet	Use all of warmed-fillet from PHASE B as directed above.

PHASE OUTPUTS

Key	Phase Output	Description
rested-steak	Rested steak	Hibachi-seared fillet after its 10 min rest.

The brief hibachi finish adds radiant heat and smoke while limiting overshoot of the interior.

PHASE F — FINAL FRY AND SAUCE FINISH

May overlap: PHASE E — HIBACHI SEAR AND REST during the steak rest.

Illustrative service timing:

- 18:20–18:23 Second fry during steak rest.
- 18:23–18:25 Warm and finish sauce.
- Hold both hot for plating.

<u>Neutral frying oil</u> Neutral frying oil. Source amount: as needed.	As needed	—	29. Fry potatoes at 190 C for 2–3 min until golden and crisp.
<u>Butter</u> Butter.	20 g	3.08%	30. Drain and season immediately with salt, MSG, and smoked paprika.
<u>Sesame oil</u> Sesame oil.	5 g	0.77%	31. Warm the reserved sauce base gently.
<u>Salt</u> Salt. Source amount: to taste.	As needed	—	32. Whisk in butter and sesame oil to finish the sauce.
<u>MSG</u> MSG. Source amount: pinch.	As needed	—	
<u>Smoked paprika</u> Smoked paprika. Source amount: pinch.	As needed	—	

TECHNIQUE APPLICATIONS		
Technique	Controls	Purpose
<u>Double frying</u>	Second fry 190 C for 2–3 min	Crisp the exterior immediately before plating.

PHASE OUTPUTS USED	
Phase Output	Use
Reserved gochujang sauce base	Use all of sauce-base from PHASE A as directed above.
Par-cooked fries	Use all of par-cooked-fries from PHASE C as directed above.

PHASE OUTPUTS		
Key	Phase Output	Description
finished-fries	Finished fries	Crisp, seasoned fries held hot for plating.
finished-sauce	Finished gochujang sauce	Warm sauce finished with butter and sesame oil.

Double frying separates cook-through from final dehydration for exterior crispness.

PHASE G — SLICE, PLATE AND SERVE

Illustrative service timing:

- 18:28 Slice steak.
- 18:29 Build plates.
- 18:30 Serve.

<u>Celtic grey sea salt</u>	As needed	—	33. Slice steak across the grain.
Celtic grey sea salt. Source amount: to finish.			34. Season the cut faces lightly with finishing salt and black pepper.
<u>Black pepper</u>	As needed	—	35. Plate steak with charred cabbage and fries.
Black pepper. Source amount: to finish.			36. Serve gochujang sauce alongside.

PRINCIPLES

- Textural contrast – Serve the sliced steak beside charred cabbage and crisp fries.

PHASE OUTPUTS USED

Phase Output	Use
Charred cabbage	Use all of charred-cabbage from PHASE D as directed above.
Rested steak	Use all of rested-steak from PHASE E as directed above.
Finished fries	Use all of finished-fries from PHASE F as directed above.
Finished gochujang sauce	Use all of finished-sauce from PHASE F as directed above.

FAILURE MODES

Symptom	Likely cause	Corrective action
Pale or weak steak crust.	Surface moisture remained after the oven phase, or coals were not fully established.	Pat dry immediately before searing and wait for aggressive radiant heat before the hibachi finish.
Fries turn limp before plating.	First fry did not dry enough internally, or the second fry started too early.	Rest the first fry on a rack, then hold the second fry until the steak is nearly ready to rest.
Cabbage is burnt outside but rigid in the core.	Heat stayed too intense after the first char.	Move the cabbage to a slightly cooler zone after flipping and finish over moderated coals.
Sauce tastes harsh or greasy.	Gochujang was under-cooked in the base, or butter and sesame oil were added over excessive heat.	Bloom the paste fully in Phase A and whisk in finishing fats only over low heat.
